

- More than 280 numbers - over 99% North American vehicle coverage
- Holstein Brake Pad Wear sensors are direct OE replacements with perfect fit, form and function for flawless operation
- Manufactured with reinforced plastic, and able to withstand temperatures up to 400 degrees C

BRAKE WEAR SENSORS

Brake Wear Sensors are inserted into brake pads and connected by wire to the dashboard of a vehicle. When brake pads wear down to a predetermined level, a light on the dashboard indicates that both the brake pads and brake wear sensors must be replaced.

- Holstein sensors are manufactured with high-quality reinforced plastics, able to withstand temperatures up to 400 degrees C
- Wide offering - More than 280 part numbers covering over 99% of applications
- Holstein uses only the highest quality materials in our parts, for an aftermarket product that is truly built to OE form, fit, and function
- 3 year 36,000 mile warranty on all products
