- Holstein Parts Brake Pad Wear Sensors are direct OE replacements with perfect fit, form, and function for flawless operation
- Manufactured with reinforced plastic, and able to withstand temperatures up to 400°C
- Sealed anti-static protective packaging ensures that electrical components are not damaged during shipping

OVERVIEW

Brake Wear Sensors are used to warn the driver of a vehicle that the brake pads are in need of replacement. Brake Wear Sensors are installed into a vehicle's brake pads and wired into the vehicle's notification system. When the brake pads wear to the predetermined level, the driver is notified that it is time to have the brake pads and wear sensors replaced. Brake Wear Sensors have been historically used on European Imports and more recently on higher-end Asian and domestic models.

- Holstein Parts focuses on using only the highest quality materials manufactured to exacting standards for an aftermarket product that is truly built to match or exceed the OE part
- Holstein Parts Brake Wear Sensor line has superior coverage for import and domestic applications
- 3 Year / 36,000 Mile Warranty on Holstein Parts ABS Sensors
