

ABOUT HOLSTEIN

KNOCK SENSORS

- More than 400 SKU's covering 98% of the North American market
- Manufactured with premium materials to ensure proper function
- Grommets, screws, and other hardware are included to ensure proper fit
- Sealed anti-static protective packaging ensures that electrical components are not damaged during shipping

OVERVIEW

The Crankshaft Position Sensor is an electronic device that monitors the position and/or rotational speed of the crankshaft. This sensor communicates with the vehicle's ECU to control ignition timing and fuel injection parameters. Crankshaft Position Sensors work in conjunction with the Camshaft Position Sensor to monitor the position of the valves and pistons. The Crankshaft Position Sensor also measures engine speed in revolutions per minute.

- Holstein Parts focuses on using only the highest quality materials, manufactured to exacting standards for an aftermarket product that is truly built to match or exceed the OE part
- Holstein Parts Crankshaft Position Sensor line has superior coverage for domestic and import applications
- 3 year / 36,000 Mile Warranty on all Holstein Parts Crankshaft Position Sensors
